

## Introducing the NEW AccuPACK™ RECHARGEABLE EXTERNAL POWER SUPPLY

Getting workers fit tested fast and back on the job is mission critical these days and there's no time for chance and uncertainty.

Sometimes that means getting out into remote areas where there's no AC power or 'going mobile' when you need to get around - like in hospital buildings, to take your AccuFIT9000® to the worker at their own work area - rather than pulling them off their station to get Fit Tested at a central location.

AccuPACK™ has all the power you need to operate your AccuFIT9000® and 9000 PRO for a full work shift of up to 12 hours\* or more without being tied to an AC Mains power source (i.e. wall plug). It's a rechargeable hi-density power source that utilizes the latest in Lithium cell technology to ensure long life under challenging operating conditions.

AccuFIT9000® with AccuPACK™ Rechargeable Battery Pack

Rugged, quick to deploy and fully featured, AccuFIT and AccuFIT PRO Quantitative Fit Testers provide the answers you need in a format you can use and come and operate in 'Stand-alone mode' or with a PC or Tablet.

AF9-PAC Rechargeable Battery Pack

### Key Attributes

- Allows independent Remote Operation – no AC Power Needed
- Provides up to 12 Hours\* or more of Continuous Run Time with your AccuFIT9000® or AccuFIT9000® PRO
- Compact form factor fits underneath AccuFITs®
